

2020 What a Good Start

Lyrics and Music by Younis Alghamdi

2020 what a good start

I was getting close to my dream

Walking on the stage like a star

For my graduation this spring

And I am here - quarantine - with no friends

Washing my hands, drying my skin

Wonder if god would forgive my sin

Looking outside by the window

I know there's nothing that I can do

Walking in the house, calling my friend

Are we in the beginning of the end?

Coronavirus what brought you

You got the world infected

You came out of china if that is true

You were more than we expected

2020 what a good start

I was getting close to my dream

Walking on the stage like a star

For my graduation this spring
